

Services
tailored to your
needs, in a
comprehensive
and efficient
 **TECH**nological
facility

The following organizations have
contributed significantly to funding
LORIT:

Canada Foundation
for Innovation

Valorisation-Recherche
Québec

Ministère de l'Éducation
du Québec

The LORIT was initiated by the LICEF (Laboratoire
d'informatique cognitive et d'environnements de
formation), the research center of Télé-université
(Quebec's distance university).

You can use LORIT in two ways : to submit a project
involving tests or experiments or to hold an activity
covered by our services, for example a meeting with
remote sites.

For bookings or for further information, contact :

LICEF Research Center
100 - 4750, Henri-Julien Avenue
Montreal (Quebec) Canada H2T 3E4

Phone : (514) 840-2747, extension 2226
Fax : (514) 843-2151

E-mail : licef@teluq.quebec.ca

A **Hi-Tech**
environment for
your needs in
research and
development

Are you wondering how
to conduct research and
development and how to
offer research training in
a context which is
increasingly technology-
bound?

LORIT offers the latest technology
to answer **your needs** for
videoconferencing, R&D training,
learner observation and user
testing. Help your projects be
successful !

The LORIT lab can be configured to support the following uses :

- **Videoconferencing**
One-to-one, many-to-many...
- **Distance Learning**
Instructional design, diffusion of training...
- **Distance Meetings**
Distance collaboration, remote teams...
- **Presentations**
Interactive diffusion on the Web...
- **Your own**
Configure LORIT for your own use and requirements

Methods and Techniques at your disposal

LORIT offers the **services of experts** in R&D methods, and of technical staff in information technology, multimedia and telecommunications.

LORIT can give you access to rooms where **research activities** are carried out by LICEF and its partners, or where your own **research activities** can be organised, such as :

Tests and observations

- Access to technical facilities and services
- Methods and protocols for tests, observation and experiments
- Data gathering : trace and screen capture and recording
- Data archiving

Dissemination

Broadcast seminars, either interactively through the Web or as videoconferences.

Research and technology transfer

Presentation of research results, demonstrations of products, or prototypes or methods.

Training

Distance or on-site training

- Hands-on usability seminars
- Training in the use of data analysis software-creation and analysis of research databases

You can also use LORIT for your own research training sessions.

Meetings

LORIT offers meeting rooms for videoconferencing, either locally or internationally. LORIT also provides a facility for teams working remotely.

The LORIT technological facilities allow observation, and gathering and recording of multimedia data using a unique timestamp.
